(54) Title: METHOD OF SUPPRESSING ONGOING A	CUTE	ALLOGRAFF REJECTION
(57) Abstract		
The present invention provides a method of suppressing ongoing actue allograft rejection. In one embodiment, the method comprises administering to a host experiencing ongoing acute allograft rejection an IL10 inhibitor and an IL2 inhibitor in amounts effective to rescue allograft from ongoing acute rejection. In another embodiment, the method comprises administering to a host experiencing ongoing acute allograft rejection, which is due to insufficient immunosuppression by an IL2 inhibitor, an IL10 inhibitor in an amount effective to rescue the allograft from ongoing acute rejection.
